

INVITE NATURE INSIDE

TX 3100A

DECEMBER 2016

TURBOVEX
- fresh air for everyone

TX 3100A

A Decentral Ventilation with a capacity from 1400 to 3000 m³/h, can be used in the following locations:

- Auto repair shops
- Production companies
- Sports halls
- Shopping centres

MAIN COMPONENTS - TX 3100A

- 1. TX 3100A unit
- 2. Top cone
- 3. Filter holder
- 4. Inlet ring
- 5. Standard mounting brackets
- 6. Special mounting brackets (optional)
- 7. TX Electronic Control Display

FUNCTION OF THE UNIT

The principle of the heat recovery in the TX3100A is based on the rotating heat exchanger (B). The exhaust fan (A) extracts the warm room air from the funnel (D) through half of the heat exchanger (B), and send it through the exhaust cap (F).

Simultaneously the inlet fan will (C) suck air from the inlet cap (G) and send it through the other half of the heat exchanger.

The heated fresh air is sent to (E), and diffused in the room.

One half of the rotating heat exchanger will heat up in the warm flow of the exhaust air. When the heated material in the heat exchanger is in the cool flow of the inlet air, it will deliver heat from the material to the fresh air.

The process is regenerative as the heat exchanger rotates at low rpm.

The heat exchanger is equipped with a cleaning sector creating a low pressure to eliminate the possibility of undesirable leaks.

TECHNICAL SPECIFICATIONS

Dimensions L x B:	3393x1300 mm
Capacity :	1400-3000 m ³ /h
Heat recovery (3000 m ³ /h) :	74 %
Filter:	F5
Weight:	224 Kg
Power supply:	1 x 230 V/50Hz
Output (motor):	2 x 750Watt
Energy consumption (3000 m ³ /h) :	1044 Watts—1,25 Kj/m ³
Sound:	46-60 dbA
Pipe thickness of the lead-through	870 mm
Electric reheater (option)	6 kW

TX 3100A

TX 3100A is tested in cooperation with Ziehl-abegg - www.ziehl-abegg.com

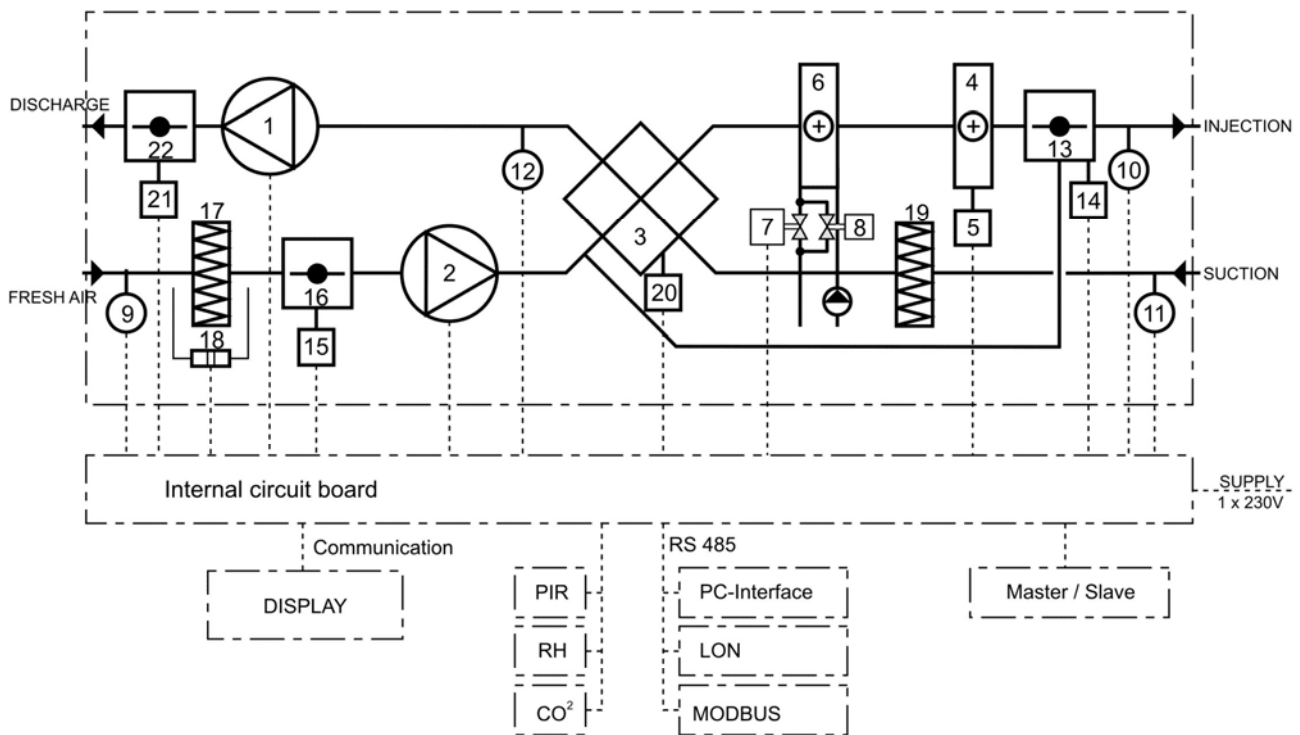

The airflow indicates the balanced air exchange in relation to the control voltage. (0-10 volt) and is shown in m³/h. The unit can be adjusted manually to suit your required air exchange.

The sound level is shown in decibel - dB (A) in relation to air exchange.

The sound is measured in 1 to 5 meters from the unit under normal conditions.

Technical description

Condensation rotor type ST1; humidity is only transferred in cases when the dew point of one of the air streams is reached during winter conditions.

ST1 is built with an untreated aluminum foil is a cost-efficient solution to recover heat for standard applications.

CS is a slide-in casing for one piece rotors $\varnothing 300 - 2600$ mm which fit into air handling units.

Rotor		
\varnothing	820	mm
Wave height	1,70	mm
Rotor width	200	mm

PROPOSAL FOR INSTALLATION

Pitch 0°

STANDARD:

TX 3100A unit
TX Electronic Control
Soft flashing sheet

OPTION:

Flashing frame for outside mounting
Extension Top (700 mm)
Extension Bottom (500 mm)
Adjustable brackets for the flashing frame (set)
Long brackets for adjustment of the suspension + - 18 cm
Mounting bracket trapeze

Pitch 10°

STANDARD:

TX 3100A unit
TX Electronic Control
Soft flashing sheet

OPTION:

Flashing frame for outside mounting
Extension Top (700 mm)
Extension Bottom (500 mm)
Adjustable brackets for the flashing frame (set)
Long brackets for adjustment of the suspension + - 18 cm
Mounting bracket trapeze

Pitch 15°

STANDARD:

TX 3100A unit
TX Electronic Control
Soft flashing sheet

OPTION:

Flashing frame for outside mounting
Extension Top (700 mm)
Extension Bottom (500 mm)
Adjustable brackets for the flashing frame (set)
Long brackets for adjustment of the suspension + - 18 cm

PROPOSAL FOR INSTALLATION

Pitch 20°

STANDARD:

TX 3100A unit
TX Electronic Control
Soft flashing sheet

OPTION:

Flashing frame for outside mounting
Extension Top (700 mm)
Extension Bottom (500 mm)
Adjustable brackets for the flashing frame (set)
Long brackets for adjustment of the suspension + - 18 cm

Pitch 25°

STANDARD:

TX 3100A unit
TX Electronic Control
Soft flashing sheet

OPTION:

Flashing frame for outside mounting
Extension Top (700 mm)
Extension Bottom (500 mm)
Adjustable brackets for the flashing frame (set)
Long brackets for adjustment of the suspension + - 18 cm

Pitch 30°

STANDARD:

TX 3100A unit
TX Electronic Control
Soft flashing sheet

OPTION:

Flashing frame for outside mounting
Extension Top (700 mm)
Extension Bottom (500 mm)
Adjustable brackets for the flashing frame (set)
Long brackets for adjustment of the suspension + - 18 cm

PROPOSAL FOR INSTALLATION

Pitch 35° (external service hatch)

STANDARD:

TX 3100A unit
TX Electronic Control
Soft flashing sheet

OPTION:

Flashing frame for outside mounting
Extension Top (700 mm)
Extension Bottom (500 mm)
Adjustable brackets for the flashing frame (set)
Long brackets for adjustment of the suspension + - 18 cm

Pitch 35° (internal service hatch)

STANDARD:

TX 3100A unit
TX Electronic Control
Soft flashing sheet

OPTION:

Flashing frame for outside mounting
Extension Top (700 mm)
Extension Bottom (500 mm)
Adjustable brackets for the flashing frame (set)
Long brackets for adjustment of the suspension + - 18 cm

Pitch 40°

STANDARD:

TX 3100A unit
TX Electronic Control
Soft flashing sheet

OPTION:

Flashing frame for outside mounting
Extension Top (700 mm)
Extension Bottom (500 mm)
Adjustable brackets for the flashing frame (set)
Long brackets for adjustment of the suspension + - 18 cm

CONTROL / OPERATION

TX Electronic Control

With TX Electronic Control / display panel , there are many opportunities for individual setup parameters.

- Forced Mode
- Prolonged Mode
- Temperature Setpoints
- Keypad Lock in 4 levels
- Alarm menu
- Software stop
- Day Mode
- Night Mode
- Calendar
- Clock/day/date
- DST Off/on
- Language
- Standby
- PIR
- Technical Menu
- System Info
- others

Master / Slave

The master / slave function allows communication between a unit (master) and up to 5 additional units (slaves 1-5). The master controls the slaves so that all 6 units run in exactly the same way.

The slaves send information back to the master. Any error that might arise in a slave unit will be displayed on the master with an error message and specification of the defective unit. Consequently, all units must be numbered.

This particular master / slave function requires an extra small circuit board for each unit. This small circuit board should be mounted on the existing main circuit board of each unit.

LON

LON (Local Operating Network) is a network where the intelligence is distributed to the devices connected to the system, and not concentrated in a control station as in a traditional network. Thousands of TX plants can be set up on the same network and the wiring can be several kilometers long. In order to use the LON network, install an additional small circuit board on the main board of each unit.

- 4 parameters can be written, 14 parameters can be read

MODbus / RS-485

MODbus is an industrial standard of serial communication for use in client/server communication between devices that can be connected through different networks. 247 TX units can be installed in the same MODbus network and cable length can be up to 500 meters, extended up to 1000 meters at low speed data communication. In order to use the MODbus network, install an additional circuit board on the main board of each plant.

- 16 parameters can be written, 17 parameters can be read

MODbus m/converter and pc-software

MODbus is an industrial standard of serial communication for use in client/server communication between devices that can be connected through different networks. 200 TX units can be installed in the same MODbus network and cable length can be up to 500 meters, extended up to 1000 meters at low speed data communication. In order to use the MODbus network, install an additional circuit board on the main board of each plant.

- 38 parameters can be read and written
